USE

Each wiring harness is normally constructed in accordance with a harness diagram furnished by the end-use manufacturer to the wiring harness manufacturer and is generally designed for a specific application which is indicated on the diagram or carton marking. Wiring harnesses are assembled from components specified in the end-use Follow-Up Services Procedure.

UL MARKING

The Recognition Mark of Underwriters Laboratories Inc. (as illustrated below) on the smallest bundle or unit container in which the product is packaged is the only method provided by UL to identify these products manufactured under its Recognition and Follow-Up Service.

WIRING HARNESS

UL, in performing its functions in accordance with its objectives, does not assume or undertake to discharge any responsibility of the manufacturer or any other party. UL shall not incur any obligation or liability for any loss, expense or damages, including incidental or consequential damages, arising out of or in connection with the use, interpretation of, or reliance upon this Guide

Only those products bearing the UL Mark should be considered to be listed and covered under UL's Follow-Up Service. Always look for the Mark on the product.
